MANUAL FOR USE, INSTALLATION and MAINTENANCE

**UK** - AVOID IMPACT WITH THE CORNERS OF THE GLASS THIS MAY CAUSE IMMEDIATE OR DELAYED SHATTERING

### Notes on this manual

Partial or total reproduction or copying of this manual without the permission of the manufacturer is prohibited. The contents of this manual are subject to change with no advance notice. Every effort has been made in preparing this manual to ensure the accuracy of its contents. However, if you have any questions or discover any errors, please contact the manufacturer. The manufacturer shall not be held liable for consequences arising from use of the product. The drawings and diagrams contained in the manual are to be considered approximate and are provided only for information

## SALES RULES AND REGULATIONS

The manufacture recommends carefully reading this booklet

- The manual is provided together with the product and must be kept for future consultation during the entire life of the product and must be transferred to any product owner or installer.
- The product must be installed without many any modifications, under penalty of warranty cancellation. The assembly procedures, tools and materials that are indicated must be respected.
- The product was designed and built for installation on a masonry wall; if installed on another type of wall (ex. plasterboard, wood, etc.), the installer is responsible for providing reinforcement to ensure the secure installation of the product.
- For silicon sealing, use acetic silicon.

When installation is complete, remove all packaging items and installation waste according to the current regulations of the country of product use.

## ROUTINE MAINTENANCE OF SHOWER ENCLOSURE AND VISIBLE PARTS

Lime scale and aggressive detergents may make the surface of the shower enclosure opaque over time.

The Manufacturer suggests the following:

Never use powder detergents. Liquid detergents may be used if they are free of alcoholic substances.

Never use products such as ammonia, acetone, alcohol and the like because they may permanently damage the shower enclosure.

After use, your shower should be cleaned with soap and water. This is particularly important in hard water districts where insoluble lime salts may be deposited and allowed to build up.

Cleaners of a gritty or abrasive nature should not be used. Care should be taken to avoid contact with strong chemicals such as organic solvents and strippers.

Glass cleaners can be used but with caution, if in doubt, contact the manufacturer of the cleaner in question.

Please keep these instructions for aftercare and customer service details.

## GUIDE TO INSTRUCTIONS

Installation PHASE

sequence of the OPERATIONS to be performed during a PHASE

PR2 component identification

	A(mm)	B(mm)
SLIDER 1500	1450-1500	575
SLIDER 1700	1650-1700	675
